PROFILE

B.Tech Computer Science student (2023–2027) focused on backend and full-stack web development. Experienced with Node.js, Express, and MongoDB through self-driven projects built for real small-business use cases. Seeking a backend/full-stack development internship to apply and grow these skills in a production environment.

EDUCATION

Invertis University — B.Tech, Computer Science & Engineering

2023 – 2027 (Expected)

CGPA: 7.7 / 10 (73%)

Woodrow Senior Secondary School, Bareilly — Senior Secondary (12th)

Percentage: 71%

Army Public School, Bareilly Cantt. — Higher Secondary (10th)

Percentage: 70%

TECHNICAL SKILLS

- Backend: Node.js, Express.js, REST API design & development, JWT Authentication
- Databases: MongoDB, MySQL, SQL
- Languages: JavaScript, Python, Java (Intermediate), C++ (Basics)
- Frontend: HTML, CSS, JavaScript
- Tools: Git, GitHub, Postman, Visual Studio Code, Jupyter Notebook
- Also familiar with: Python data libraries (Pandas, NumPy, Scikit-learn), Tableau, Power BI

PROJECTS

Event Booking Platform — Marriage Hall Management System

Node.js, Express, MongoDB, JavaScript

- Built a full-stack booking platform for a family-run event venue, featuring a real-time availability calendar and booking-conflict validation to prevent double-booking.
- Designed REST APIs to manage bookings, customer details, and event dates, with data persisted in MongoDB.
- Deployed the application for active use by the business, replacing a manual, paper-based booking process.

Invoicing & Customer Record System

Node.js, Express, MongoDB, PDFKit

- Developed a backend invoicing system for a small business that generates PDF invoices programmatically and stores records indexed by customer number.
- Implemented search and retrieval of past invoices by customer ID, reducing manual lookup time.
- Structured the data layer in MongoDB to support fast, indexed queries as records scale.

College Portal — Front-End & Backend Integration

HTML, CSS, JavaScript, Express.js

- Rebuilt a college website and login system with a Node.js/Express backend, supporting basic authentication and CRUD operations.
- Focused on responsive UI and clean route structure to connect frontend pages with backend logic.

Data Science Mini-Projects

Python, Pandas, Scikit-learn, Matplotlib

- Built a health insurance premium prediction model and a resume-scoring tool using Python and scikit-learn, with data visualization for model evaluation.
